METHODOLOGY

IFPI conducted global research in April-May 2018 which explored the way consumers engage and access music across licensed and unlicensed services.

The field work was carried out by AudienceNet amongst a demographically representative sample of the online population aged 16-64 in the following territories: Argentina, Australia, Brazil, Canada, France, Germany, Italy, Japan, Mexico, Netherlands, Poland, Russia, South Africa, South Korea, Spain, Sweden, United Kingdom and United States. In addition, the study was also conducted in China and India but results from these two countries are not included in "global" figures. In each country, nationally representative quota samples of between 1,000-2,000 respondents were set in accordance with online population size and demographic structure, as determined by the latest respective census data in each territory. This ensured that a standard error of +/- 3% was achieved throughout the data, at a 95% confidence level.

These twenty territories accounted for 91.3% of global recorded music market revenues in 2017.

INTRODUCTION

MUSIC IS AN INTEGRAL PART OF OUR LIVES

The *Music Consumer Insight Report* tells the story of how recorded music is woven into the lives of people around the world.

We are passionate about music. It is personal to us. Increasingly accessible, music is embraced across genres and geographies, ages and formats - from radio to streaming and beyond.

This report looks at how music soundtracks the many parts of our day and how this love of music is also driving fans' growing adoption of technologies. From smartphones to smart speakers, music is a force ushering in these connected devices that are being taken up globally.

As ever, local repertoire continues to dominate countries' charts. There will always be something special about local music that speaks to us. In this interconnected world, country-specific genres, like K-Pop in Korea and música popular brasileira in Brazil, are not only embraced at home but are also beginning to find a broader global audience.

In this year's report, for the first time, we take a close look at the exciting, evolving music markets in China and India. In both countries, music fans are highly engaged with licensed music and local music is flourishing.

Across the globe, record companies are working to sustain and develop these rich and diverse ways in which music is being enjoyed. Driving digital innovation and

increasing the availability of music, record companies have licensed over 45 million tracks to hundreds of digital services around the world.

However, for music to thrive in a digital world there must be a fair digital marketplace. This report also shows the challenges the music community continues to face – both in the form of the evolving threat of digital copyright infringement and in fair revenues not being returned by some user-upload services.

Music unites us globally and adds enormous value to people's lives. Record companies are essential to this as they continue to develop, support and invest in music, playing a crucial role in ensuring that it continues on its exciting journey around the world.

"RECORD COMPANIES CONTINUE TO DEVELOP, SUPPORT AND INVEST IN MUSIC, PLAYING A CRUCIAL ROLE IN ENSURING THAT IT CONTINUES ON ITS EXCITING JOURNEY AROUND THE WORLD."
